**EXAMINER'S AMENDMENT AND REASONS FOR ALLOWANCE**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

CANCELLED CLAIMS 4-6.

2. Applicant's election without traverse of claims 1-3 in the reply filed on 4/30/04 is acknowledged. Non-elected claims 4-6 have been cancelled as per applicant's request.
3. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because applicant has claimed priority to a provisional application under 35 USC 120. Also the declaration lists only one provisional application whereas the specification refers to five.

4. The following is an examiner's statement of reasons for allowance:

Claims 1-3 are distinguishable over the prior art. The prior art of record does not show or reasonably suggest, in combination with the other claimed subject matter, a method for tracking ships and identifying at least one ship that was most likely to have caused an environmental spill as set forth in claim 1. Dependent claims 2-3 are distinguishable for at least the same reasons. The closest prior art appears to be the patent to Schüssler et al.

Art Unit: 3661

(5,633,644) in which orbiting satellites are used to detect oil spills and ships within an observable area and to determine which ship most likely caused the oil spill. Schüssler does not track ships by receiving ship reports at a remote location, storing the reports and using the report information to compare with an origination time and point of an environmental spill to select at least one ship most likely to have caused the spill.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Baxter, Jr. (5,532,679) is directed to detecting an oil spill and reporting its location to a remote monitoring station.

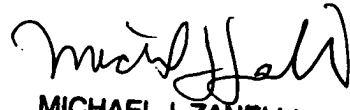

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Zanelli whose telephone number is (703) 305-9756. The examiner can normally be reached on Monday-Thursday 5:30 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas G. Black can be reached on (703) 305-8233. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
